**STRIKE**

THE OFFICIAL FOOTWEAR PARTNER OF  
**IGFA**

# THIS IS OUR STORY

Strike was founded by a lifelong fisherman and expert shoemaker who set out to create footwear built for the demands of angling. We design performance-driven shoes using innovative materials that deliver comfort, grip, and durability – whilst prioritising the health of our oceans. Strike is the official footwear partner of the International Game Fish Association.

Strike began with a conversation amongst a close-knit fishing community. Angling is a technical and demanding sport – so where is the equipment to accommodate that? One such member of that community happened to have 50 years' experience as a shoemaker. He had sustained many injuries as a

lifelong fisherman and sought to set a new standard for angling footwear that would enable optimal performance when out on the water.

Created by Stephen Palmer, expert shoemaker, seasoned angler, and owner of Overland Shoes – Strike brings decades of footwear design and manufacturing expertise to the world of angling. Along with a team of craftsmen and materials specialists, he constructs cutting-edge footwear designed for enhanced performance, comfort and durability. As the official footwear of the IGFA, every Strike purchase directly contributes to our shared commitment to protect our oceans and educate future generations.

# THIS IS OUR PARTNERSHIP

Strike is proud to partner with the International Game Fish Association (IGFA) to protect the future of our sport and the waters that sustain it. Together, we're committed to preserving marine ecosystems, supporting responsible angling practices, and promoting aquatic education and research.

Founded in 1939, the IGFA is a globally recognised non-profit organisation dedicated to the conservation of game fish and the promotion of ethical angling practices. With a presence in over 100 countries, the IGFA sets international fishing rules and maintains world record standards, while also leading efforts in scientific research, habitat protection, and youth education.

With every pair of Strike footwear sold, a portion of proceeds goes directly to IGFA initiatives. These initiatives include habitat restoration efforts, tagging programs that provide critical data on fish migration and population health, and global educational programs that teach young anglers about sustainability and stewardship. Through these efforts, the IGFA ensures future generations not only inherit thriving marine environments but also understand the responsibility that comes with enjoying them.

# OCEAN MADE FOOTWEAR

# THE FUTURE OF ANGLING FOOTWEAR

Engineered for superior performance, designed to protect our oceans.

**STRIKE**

## **STRIKE OUTSOLES POWERED BY SOLUM™: PERFORMANCE THAT REGENERATES THE EARTH**

Strike represents the future of angling footwear by combining a deep heritage in shoemaking with forward-thinking design and material innovation.

Our research led approach has produced advanced technologies for performance in the harshest marine conditions. Through continuous material discovery and integration of recycled and bio-based components, Strike delivers technical excellence with a reduced environmental footprint.

STRIKE

# JOIN US IN MAKING A DIFFERENCE

Our products are thoughtfully designed for comfort and reliability in marine environments. While we're continually exploring ways to improve performance and reduce environmental impact, our focus is on making responsible design choices that support long-term durability and usability on the water.

## ***RECYCLED EVA AND RPET:***

We incorporate recycled EVA (Ethylene-Vinyl Acetate) in the footbed and midsole to reduce the need for virgin materials and lower the environmental impact of extraction and processing. Reusing EVA helps keep plastic waste out of landfills and oceans, while still delivering the cushioning and support needed.

We also use recycled RPET, made from post-consumer plastic, to create lightweight and moisture-regulating material. This not only diverts plastic from the waste stream but also reduces our reliance on virgin polyester, helping cut down on emissions and resource use.

## ***LEATHER WORKING GROUP:***

The water repellent leather used in our boat shoes is sourced from a Leather Working Group (LWG) certified tannery. The LWG is a global not-for-profit that audits and certifies leather manufacturers for their environmental performance and responsible practices.

# BLUEFIN LACE SNEAKER

The Bluefin Lace Sneaker ensures full control with advanced traction and rapid drainage. This is a lightweight performance sneaker built for traction, support, and comfort in demanding marine environments. Its upper is made from breathable SEAQUAL® YARN, utilising Upcycled Marine Plastic to help combat ocean plastic pollution. A TPU toe bumper offers additional protection at the toe, whilst the versatile design maintains comfort during extended time on the water. An EVA midsole, and our Aqua Deck Sole incorporating rubber and Solum Bio Tread™, provides enhanced stability and grip, keeping anglers secure and supported on all wet and slippery surfaces.

### PRODUCT DETAIL

- Mesh knit upper with SEAQUAL® YARN and recycled polyester
- Perforated synthetic leather overlays
- Recycled polyester laces and tongue puller
- Microfiber tongue with perforated foam pocket
- Soft TPU film toe cap for enhanced protection
- Anatomic moulded heel counter for stability
- Fast-drying mesh lining and sock liner with SEAQUAL® YARN and recycled polyester
- Perforated EVA footbed for cushioning, shock absorption & water drainage
- Mesh lined footbed cover made from SEAQUAL® YARN and recycled polyester
- EVA midsole containing recycled content for responsive support
- High-traction rubber outsole powered by Solum™ Bio Tread

# BLUEFIN SANDAL

The Bluefin Sandal is crafted for ultimate performance and comfort on the water. Its advanced Aqua Deck Sole, powered by Solum Bio Tread™, provides reliable multi-surface grip while gradually releasing plant-based nutrients back into the environment. The upper, made from recycled polyester and spandex, dries quickly and enhances breathability, aided by integrated ventilation panels that boost airflow. Strategically placed drainage channels at the toe and sides rapidly expel water through the Aqua Sluice system, keeping feet light and dry. A reinforced outer toe cap offers added protection, while the EVA midsole ensures stability and cushioning with every step.

# SILVERTIP STRAP SNEAKER

A versatile sneaker built for long days on and off deck, offering secure fit, fast drainage, and all-day comfort. Engineered for on-deck performance, the Silvertip Strap Sneaker uses recycled materials to reduce impact without compromising function. The upper section is crafted from SEAQUAL® YARN, which contains Upcycled Marine Plastic, actively contributing to ocean plastic reduction. Our innovative Aqua Sluice Gill technology features engineered channels for rapid drainage, minimising water retention to keep feet dry and comfortable. A fully adjustable strap ensures a locked-in fit, offering superior stability and control on wet, dry, or uneven surfaces.

# SILVERTIP BOAT SHOE

A stylish boat shoe in that offers an all day, every day fit with supreme traction and quick-dry drainage technology. The Silvertip Boat Shoe is crafted for anglers who value performance and style, on and off the deck. Its upper blends premium LWG-certified water-repellent leather with a knitted inner sock made from SEAQUAL® YARN, containing Upcycled Marine Plastic. Aqua Sluice Gill technology enables fast drainage and reduces water retention for lasting comfort, while the footbed and mesh cover incorporate recycled materials. The Solum Bio Tread™ outsole ensures multi-surface grip, and aqua cleat lacing delivers a secure, stable fit in all conditions.

# NARROWTOOTH FLIP FLOP

The Narrowtooth Flip Flop offers shock-absorbing comfort and robust performance for diverse conditions.

Designed for long days on and off the water, it balances lightweight ease with reliable stability. Its padded, water-repellent leather strap comes from a Leather Working Group (LWG) certified tannery, ensuring both enhanced comfort and responsible sourcing. Increased cushioning is provided by the three-density EVA footbed and midsole, while the 100% RPET webbing toe post adds durability. This flip flop features Strike's Aqua Deck Outsole with Solum Bio Tread™ ensures non-slip traction on wet and dry surfaces, slowly releasing plant-based nutrients back into the environment with every step.

### PRODUCT DETAIL

- Genuine leather strap with protective finish
- Padded upper and perforated detail for comfort
- Recycled polyester webbing toe post
- Quick-drying mesh lining with SEAQUAL® YARN and recycled polyester
- Textured grooves in an EVA footbed for cushioning, shock absorption and foot stabilisation
- EVA midsole containing recycled content for lightweight support
- High-traction rubber outsole powered by Solum™ Bio Tread

# DOGTTOOTH CLOG

The Dogtooth Clog delivers exceptional grip and versatile, all-day comfort for life on and off the water.

Engineered for easy wear, it balances functionality with a relaxed fit. The non-slip, high-traction rubber sole powered by Solum™, ensures secure footing across wet and dry surfaces, while gradually releasing plant-based nutrients back into the environment. The moulded EVA upper offers lightweight support, and intelligent footbed grooves help stabilise your foot during movement. An adjustable back strap allows for a personalised fit and easily converts the clog into a slip-on mule.
